

DINOS IN YOUR CLOSET!

Inspired by the archeological remains of dinosaurs, Finnish company Kayiwa have created the Dino clothes rack thanks to the power of 3D printing. Despite being a designer piece, the Dino is intensely practical, allowing you to indulge in a little flight of fancy without worrying that you're buying something entirely impractical. Fit for use in public areas, foyers, hallways or your closet, the Dino adds a sense of fun to wherever it hangs. It's practical too, hanging from a stainless steel bar with spacers, the hangers stay where they are, meaning that your clothes are always organised and don't bunch up when you reach for them. kayiwa.fi
