

AAKKOSET SHELF / ROOM DIVIDER

• Lincoln Kaiyva
• Finland

The meticulous 4-week process to make just one AAKKOSET uniquely combines the very latest manufacturing technology with traditional craftsmanship. In brief, handpicked cut-to-size number is fed through a 5-Axis Computer Numerically Controlled (CNC) router. It is thoroughly glued, pressed and primed before a deep rich paint job is first mechanically applied and then finished by hand. It is available in black, blue, green, orange, red, violet, yellow and white.
